

HTC Wizard 200 Screen Cover Replacement

Installation of the screen cover on the HTC Wizard 200.

Written By: Kyle Champ

INTRODUCTION

This guide will explain how to install / remove the screen cover from the HTC Wizard 200.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Spudger](#) (1)
 - [T5 Torx Screwdriver](#) (1)
-

Step 1 — Battery

- Remove the back case with your fingernail to expose the battery. (Not shown in picture)
- Pull the black tab to remove the battery.

Step 2 — Back Panel

- Use a spudger to begin removal of the camera cover by inserting the flat end into the two notches and gently pry them up one at a time.

Step 3

- Work the spudger around the edge of the camera cover to release the clips.

Step 4

- Use a [T5 Torx screwdriver](#) to remove four 6mm screws that secure the back panel to the main body.

i There is a screw under the "void" sticker.

Step 5

i Device rotated 180 degrees.

- Insert the flat end of a spudger into the crack between the front and rear cover.
- Once you have enough of a gap to fit a plastic opening tool into it, use the opening tool to release the clips.

Step 6

- Use the plastic opening tool to continue releasing the clips until you have worked your way around the edge.

Step 7

- Pull off the back case panel.

Step 8 — Motherboard

- ⓘ Device rotated 180 degrees.
- Use the spudger to pry off the camera.

Step 9

- ⓘ Device rotated 90 degrees CCW.
- ⓘ You may need to remove a strip of orange anti-static tape (not pictured).
- Flip up the connector latch.
- Use the tweezers to detach the flexible connection.

Step 10

- ① Device rotated 90 degrees CW.
- Slide the screen slider into the open position.

Step 11

- Use the spudger to push out the motherboard.

Step 12

- Use your hands to gently expose the underside of the motherboard.
- Use the spudger to pull off the flexible connection.

 Be careful not to pull apart the motherboard connection quickly, as the connection and cables could be damaged.

Step 13 — Keyboard Slider

 Device rotated 180 degrees CW.

- Use the T5 Torx screwdriver to remove four 5mm screws that secure the keyboard slider to the main body.

Step 14 — Screen Cover

- Use the T5 Torx screwdriver to remove four 5mm screws that secure the back of the screen casing.

Step 15

- Insert the plastic opening tool between the front panel and the rear panel and pry open to reach the screen.

Step 16

- Once the rear panel is loose, lift it off of the front panel.
- The flexible connection will pop loose.

Step 17

- ⓘ Device rotated 90 degrees CCW.
- Remove the yellow anti-static tape.

Step 18

- Unscrew the two 3mm phillips #0 screws from the bottom of the device that secure the rigid flex board to the screen panel.

Step 19

 Device rotated 180 degrees CW.

- Unscrew the two 3mm phillips #0 screws from the top of the device that secure the rigid flex board to the screen panel.

Step 20

- ❗ Device rotated 90 degrees CCW.
- Unhinge the flexible connection and use the tweezers to disconnect.

Step 21

- Now that the rigid flex board is loose, remove it from the screen.

To reassemble your device, follow these instructions in reverse order.
